PROJECTS

Portfolio Website using Next.js 13, Tailwind CSS – [Preview Link](#)

Developed a responsive and visually appealing portfolio website using Next.js 13 and Tailwind CSS. Designed and implemented a modern user interface to showcase my web development, design, and UX/UI projects. Demonstrated proficiency in front-end technologies and design principles while creating this personal project.

PROJECTS

Online voting System Using PHP- MYSQL – [Github Link](#)

Developed a secure and user-friendly Online Voting System as a project, showcasing proficiency in PHP backend development, HTML/CSS frontend design, and MySQL database management. Implemented features such as user authentication, real-time result tabulation, and responsive design. Conducted thorough testing and documentation, demonstrating the ability to independently design and manage complex web applications.

Online food ordering System Using PHP- MYSQL

I developed an Online Food Ordering System as a personal project to advance my web development skills. This project demonstrates my proficiency in backend development using PHP, frontend design with HTML/CSS, and database management using MySQL.

Attendance management System Using PHP- MYSQL

The Attendance management System was developed to manage attendance of a class and get the report of each student in class

Pharmacy management System Using NodeJS- MYSQL

I designed and developed a Pharmacy Management System using Node.js as the backend technology and MySQL as the database. This project showcases my proficiency in full-stack web development, database design, and software architecture.
